Program Fees

One advantage of having a guest speaker coming to your school would be the elimination of fees associated with scheduling a bus and a bus driver, plus the expense of admission. The average cost for just one school bus is between \$200-500 per day. I have the ability and willingness to tremendously reduce that cost. The fee for the programs is only \$4.00 per student which includes preparation, set up, tear down and travel expenses.

The second advantage to provide in school programs is the time commitment. A field trip can require a full day out of class, eliminating the possibility of additional teaching for that day. A one hour, hands on program provides additional time for students to continue their studies instead of missing an entire day away from the classroom.

The school will need to provide 24 linear feet of table space (3—8ft tables) to display a variety of hands on items. If it is less, some of the artifacts would be removed to accommodate the table space. For that reason, it is best to use a larger room that suits the number of students for each program.
